

Possible Scenario

add 2 new resource groups
rg-lalit
rg-abhishek

Delete rg-lalit from terraform

rg delete from portal but code bna bna tha terraform se

terraform apply -auto -approve without asking will run apply

Terraform me bhi kahi na kahi dimang hota hai../

Nadi Kinare saanp hai... terraform destroy chalaap hai..

CODE HI SATYA HAI..

When Terraform State file created.it's create after first time apply

Har Resource ka azure me ek unique identity hota hai..usko id bolte hai

Terraform State file ko edit nhi karna hai..

Dekhna hai toh terraform state list cmmand use karna hai..
