

Code ke Dukh

HardCoded Subnet ID-iska solution lana pdega?

```
subnet_id = "/subscriptions/043c7cd8-9a4a-4c40-a724-72ad505082f3/resourceGroups/cth-r  
g1/providers/Microsoft.Network/virtualNetworks/cth-vnet01/subnets/cth-frontend-subnet01"
```

HardCoded Password-iska solution lana pdega?

```
admin_username = "cthadmin01"  
admin_password = "Cthadmin01"
```

Public Ip Address bhi bahut bada paap hai ..isko bhi hatana pdega

```
public_ip_address_id=azurerm_public_ip.pip.id
```

Data Block:Bane hue resources details ko fetch uske liye aapka data block use hota hai.

Resource ko create karne ke liye resource block

Resource ki details ko fetch karne ke liye data block

azurerm\_resourcegroup terraform

azurerm\_resourcegroup terraform data

azurerm\_virtual\_network terraform

azurerm\_virtual\_network terraform data

Argument:vo parameters jo block ke ander daal sakte hai

Attributes:vo parameters jo block se nikalate hai

Cthadmin01
